INSTRUCTION FOR USE OF PARTS LIST

This parts list is to be used when ordering replacement parts; it contains all parts for model Z50J1.

I. How to order parts.

1. Information required

Replacement parts orders must contain both the **part number** and the **stamped number(s)** as described below. This is because any changes and modifications of parts are registered at HONDA with the pertinent parts and stamped numbers.

Numbers needed:

(a) Carburetor parts: Part number and
Stamped carburetor identification number

(b) Engine parts: Part number and
Stamped engine number

(c) Frame parts: Part number and
Stamped frame number

2. Revisions

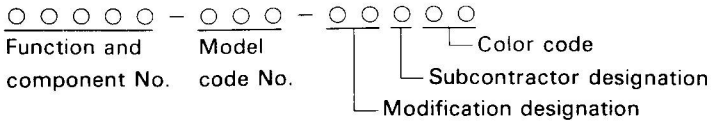

When modifications or additions to this parts list are made, a revised edition will be issued at an appropriate time, with successively progressing revision numbers on the cover.

We recommend obtaining such revisions in order to keep your parts lists up-to-date at all times. To check whether a parts list revision has been issued, please contact your HONDA distributor.

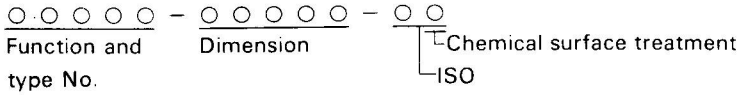

II. How to read this parts list.

1. Make-up of the part number

(Example) General parts

(Example) Bolts, nuts and other standard parts

2. Color code

The color code at the end of the part number indicates the color. Codes below ZA in alphabetical order (such as ZA, ZB, ZC, etc.) do not indicate the color directly, but reference must be made to the HONDA code given in the "Description" column of this parts list.

Color code		Color description

4. Dimensions

All dimensions are given in millimeters (mm) except in the case of steel balls, tires and tire tubes.

Parts	Example	Interpretation
Bolt (Screw)	6×12	6mm diameter, 12mm length
Pin	8×14	8mm diameter, 14mm length
O-Ring	9.5×1.6	9.5mm diameter, 1.6mm thickness
Oil seal	14×24×5	14mm inside diameter, 24mm outside diameter, 5mm thickness
Tube	5×130	5mm inside diameter, 130mm length

5. Supersedence of parts

Part numbers given under the part name in the "Description" column indicate that the part number has been superseded by that part number. HONDA may make such supersedence without notice.

6. Assemblies

Sections framed with broken lines in the exploded view drawings are available as complete assemblies. (Their individual parts can also be obtained.)

7. Required quantity

The number given in the "Reqd. No." column indicates the quantity of parts used in the section described in that block.

Parts with quantities in ( ) represent optional parts.

Part whose required number is "N", is part whose required number can be selected at need.

8. Part modifications-applicable serial numbers

In cases where a part has been modified, the serial number of the first vehicle (or frame, engine, carburetor) bearing the modification is listed in the **"Serial No."** column.

9. Models, area codes and initial serial numbers

Models, area codes and intial serial Nos. given in this parts list can be identified as follows.

Parts with area codes are exclusive for models destined for countries designated.

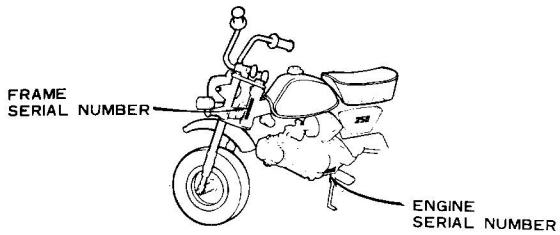

If no area codes are listed, parts are for common use.

Model	Area code	Type	Applicable engine serial No.	Applicable frame serial No.	Applicable carburetor identification No.

HOW TO USE THE FLAT RATE TIME (F.R.T.)

This F.R.T. (Flat Rate Time) is used to determine the standard labor time allowed for replacement of parts covered by the warranty during the period the warranty is in effect. The F.R.T. for those parts which are not listed herein should be determined from the operation closely related to the replacement of that part.

1. The F.R.T. is based on the following servicing conditions

a. A liberal allowance is added to the net servicing time.

b. Standard times specified are based on the condition that the necessary servicing tools listed in the service manual (motorcycle) which describes the HONDA service policy are available close at hand and the work performed by a mechanic with normal skill.

c. Time required for inspection and operational test following the servicing is included in the F.R.T.

2. Method of computing

The job times are listed in tenth of an hour to simplify computation.

(Example) 0.3 = 18 minutes

5.6 = 5 hours and 36 minutes

CONVERSION CHART			
Hours	Minutes	Hours	Minutes
0.1	6	0.6	36
0.2	12	0.7	42
0.3	18	0.8	48
0.4	24	0.9	54
0.5	30	1.0	60

3. Computing the F.R.T.

When several jobs are performed at the same time, make the calculation in the following manner.

a. Jobs of non duplicated nature

The F.R.T. for the job is obtained by totalling the F.R.T. for each part replaced.

(Example) Replacement of cylinder and clutch spring.

Service item	F.R.T.
Cylinder	1.0
Clutch spring	0.8

The F.R.T. for the job is : 1.0+0.8=1.8

b. Jobs of duplicated nature

Take the F.R.T. for the last part to be replaced.

(Example) Replacement of piston and cylinder head gasket.

Service item	F.R.T.
Cylinder head gasket	0.8
Piston	1.2

The F.R.T. for the job is : 1.2

c. Jobs of partially related nature

Total up the F.R.T. for all of the parts replaced and then subtract the F.R.T. for the duplicated operation.

(Example) Replacement of gear shift drum and crankshaft assembly.

Service item	F.R.T.
Gear shift drum	☆3.0
Crankshaft	☆3.3
Crankcase disassembly	☆2.8

The F.R.T. for the job is : (3.0+3.3)−2.8=3.5

Crankcase disassembly is the duplicated operations.

●The F.R.T. shown with (☆) includes engine removal and installation.

4. Operations other than replacing parts.

a. Removal and installation

No.	Service item	F.R.T.
1	Engine	1.2
2	Cylinder head	0.8
